

Trull – Dipford Rd extension of 30mph limit

Install new post and 600mm 30 Terminal on LHS with NSL on back and 30 roundel adjacent.

First repeater we could use the existing road narrows post and add a 30 repeater underneath on both sides or we could install a new post on the left hand verge just after Dipford Barn

2nd repeater under Road Narrows sign on both sides- grass will need cutting back underneath

3rd repeater near Dipford Orchard on Reduce Speed now sign – check enough height and vegetation needs cutting back check on site. Check if visible from both directions if not may need to install another post or a roundel possible location for another post on footway opposite White Lodge

4th Install roundel on the road just before Hillbrook House as no room for post and likely to be obscured by overgrown vegetation.

Remove 30 terminal and NSL and replace with 300mm 30 repeaters on existing posts x 2 – Don't think the post on the pavement side is visible and likely to get overgrown so propose removing post and signs as repeater will be clearly visible on verge side.
